## **VALVE TESTING IN WAIMANALO**

HONOLULU – On Tuesday, April 29, Board of Water Supply (BWS) crews will be conducting valve testing on Hihimanu Street in Waimanalo from 8:30 a.m. to 2:30 p.m. Valve testing is being conducted as part of a project to relocate BWS waterlines off of state property and into a City and County of Honolulu roadway.

Approximately 100 homes could experience sporadic water outages during the testing period. Water customers along and near Mekia Street and Poalima Street are advised to store enough water for cooking, drinking, and sanitation needs during the testing period. A water wagon will be positioned on Hihimanu Street to provide water should an outage occur. The valve testing is not expected to result in any major traffic disturbances in Waimanalo.
