WORKING PAY-PHONE BOOTH IN LOBBY ACROSS FROM ELEVATOR

1930s federal funds made many city fixtures possible

Honolulu Star-Advertiser 9 Jan 2012 JUNE WATANABE — Write to "Kokua Line" at Honolulu Star-advertiser, 7 Waterfront Plaza, Suite 210, 500 Ala Moana Blvd., Honolulu 96813; call 529-4773; fax 529-4750; or email kokualine@staradvertiser.com.

ANSWER: Yes, they were, although large portions have been removed as part of the ongoing Ala Moana/ Nimitz Highway improvement project.

The WPA was a New Deal agency that spent billions of dollars in the 1930s putting unemployed and unskilled workers to work on public works projects, including the construction of roads, bridges, buildings and parks; operating arts, music and literacy projects; and feeding and housing the poor.

Hawaii got some of the

QUESTION: While walking along Ala Moana Boulevard fronting Kewalo Basin, I noticed that the sidewalk is periodically stamped "WPA 1939," I do know that the Great Depression had special government projects created to supply jobs for the unemployed. The agency in charge was called the "Works Progress Administration," later renamed the "Work Projects Administration." The Ala Moana sidewalks seem to be in good shape if they are 72 years old. Were they made under the WPA? money even though it was only a territory back then.

Perhaps more interesting than the sidewalks is the fact that Ala Moana Beach Park, as well as several other city parks, were built with federal funding, either from the WPA or predecessor agencies. We found out that bit of information from E. Tory Laitila, registrar for the Mayor's Office of Culture and the Arts.

In its November calendar of current events, his office highlighted "The Makahiki Festival," a pair of murals painted by Robert Lee Eskridge in the 1930s, funded by the WPA.

The murals are permanently installed at the ester Mccoy Pavilion (Ewa structure near the circular driveway behind the tennis courts) at Ala Moana Beach Park. (The pavilion is open to the public, 8 a.m. to 4 p.m. Monday through Friday, and during special events.)

Other works in the Art in City Buildings collection funded by the federal government in the 1930s are a floor mosaic and a pair of bas-relief panels, Marguerite Blasingame, also at Mccov Pavilion; the "Roosevelt Portal" gate by Harry Sims Bent at Ala Moana Park and Atkinson Drive; the "Equestrian Bridge" by Bent at Ala Moana Park; and the "Ka Wai Ake Akua" mural by Blasingame at the entrance of the Board of Water Supply's main building.

With the help of the Hawaii Public Library's serials section, we obtained a copy of a March 7, 1936, Honolulu Star-bulletin article describing the development of what was then called "Moana Park" — the "newest link in Honolulu's chain of playgrounds."

The article notes that with the creation of the Civil Works Administration and the Federal Emergency Relief Administration in 1933, two years before the WPA, construction began on the "sports pavilion, one small canal bridge, and the Roosevelt portals — the latter having been formally dedicated by President Roosevelt himself on July 27 during a visit to Hawaii."

With "effective and generous cooperation" by various federal agencies, work also was completed on Thomas Square, Aala Park, Lanakila Park, Waialae Park, Pauoa Park and the 75-foot-wide promenade along the Ala Wai, between Kalakaua Avenue and Ala Moana.

Within Moana Park a 27foot, concrete-lined drainage ditch along the entire length of the park was built; the entire park area was graded; two lagoons were excavated; the piers and docks for the yacht club were erected; and half the 78-acre park covered with topsoil and equipped with a sprinkler system.

Laitila also pointed out that Board of Water Supply buildings were funded by the WPA. A stone plaque noting that fact is affixed to the Diamond Headmauka corner of the BWS building on Alapai Street, between Lisbon and Alapai streets.

MAHALO

To the good Samaritan who found my credit card at the Dillingham Foodland Supermarket parking lot and turned it in in December. — A very thankful senior
