

CENTRAL OAHU WATERSHED MANAGEMENT PLAN

COMMUNITY MEETING #3: ISSUES, PROJECTS, AND STRATEGIES

The Honolulu Board of Water Supply and the Department of Planning and Permitting are developing the Central Oahu Watershed Management Plan. Central Oahu's aquifers provide water to Waianae and Honolulu. With climate change causing more intense drought and flooding, how do we ensure there are sufficient water resources for Central Oahu's population and its agriculture? Please join us to discuss water related issues and concerns and how conservation and diverse water supplies will help meet future water demands and protect watersheds in Central Oahu.

Watershed Management Plan Objectives:

1. Promote Sustainable Watersheds
2. Protect and Enhance Water Quality and Quantity
3. Protect Native Hawaiian Rights and Traditional and Customary Practices
4. Facilitate Public Participation, Education, and Project Implementation
5. Meet Future Water Demands at Reasonable Costs

Meeting Information:

Thursday, June 27, 2019
Kanoelani Elementary School Cafeteria
94-1091 Oli Loop, Waipahu, HI 96797
7:00 - 8:30 PM
