DATE: March 21, 2025

TO: ERNEST Y. W. LAU, P.E.
MANAGER AND CHIEF ENGINEER

FROM: Henderson Nuuhiwa/ IT Division

Name of Requesting Division Head/ Division

 Digitally signed by Henderson Nuuhiwa
Date: 2025.03.21 09:12:44 -10'00'

SUBJECT: REQUEST FOR SOLE SOURCE AWARD

Pursuant §103D-306, Hawaii Revised Statutes (HRS), and Subchapter 9, Chapter 3-122 of the Hawaii Administrative Rules (HAR), I am requesting sole source approval to purchase the following:

1. Vendor Name & Address Aquanuity, Inc 6400 S. Fiddlers Green Circle, #820, Greenwood Village CO 80111		2. Amount of the contract. \$23,000
3. Term of the contract. 1 year	4. Prior sole source contract numbers and dates. N/A	
5. Description of the goods to be purchased. (Attach additional sheets if needed.) Aquanuity AquaTwin Water Desktop Software Program for Hydraulic Modeling and Analysis.		
6. Explanation how the unique features, characteristics or capabilities are essential for the BWS to accomplish its work. (Attach additional sheets if needed.) The software directly integrates with ArcGIS Pro, which is the current GIS data platform. This is a desktop software used for hydraulic modeling and analysis of water system. The product is updated frequently based on user feedback, which is essential in addressing and adapting to various water industry trends and needs.		
7. Describe the efforts and results in determining that this is the only vendor who can provide the goods, services, or construction. (Attach additional sheets if needed.) The AquaTwin Water is a desktop software program that doesn't require an Internet to access unlike other hydraulic modeling software that are solely cloud-based and requires Internet connection. This software has the capability to conduct water quality, security and resilience analysis which is essential particularly during emergency and outage when Internet is inaccessible.		

8. Other possible sources for the goods, services or construction that were investigated but do not meet the BWS's needs. (Attach additional sheets if needed.)

We are currently using InfoWater Pro by Autodesk in all our hydraulic modeling and analysis. However, Autodesk migrated InfoWater Pro to solely cloud-based which requires Internet connection. The AquaTwin Water is a desktop software program that can be access offline and potentially faster.

I certify that the information provided is to the best of my knowledge, true and correct and that the goods described above are available through only one (1) source.

Re: Sole Source Vendor

To whom it may concern,

Aquanuity provides software for water modeling, sewer and stormwater modeling, and capital planning through our AquaTwin platform (includes AquaTwin Water and Water Pro, AquaTwin Surge, AquaTwin Sewer and Sewer Pro, and AquaTwin Asset and Asset Pro). Our software solutions operate as an extension of Esri's ArcGIS Pro 3.x and are delivered directly to the customer for installation.

This letter is to confirm that our solutions are sole source products, manufactured, sold and distributed exclusively by Aquanuity, Inc. No division of Aquanuity, nor any other company, makes a similar or competing product. This product must be purchased directly from Aquanuity and has been developed and supported by us and is delivered directly to the customer. We are the sole vendor, supplier, distributor, and provider of our products.

There is no other like item(s) or product(s) available for purchase that would serve the same purpose or function and there is only one price for AquaTwin Water, AquaTwin Sewer, and AquaTwin Asset because of exclusive distribution rights.

If you have any questions, please feel free to call us at [REDACTED]

Sincerely,

[REDACTED]
